

Vexos in Ohio took all this inventory taking up 4000 sq/ft and condensed it to 500 sq/ft!

Enough room to add an SMT line! Organized and knowing where every part is! Fast kitting and no searching for lost parts! Thus, reducing labor needed for stocking and kitting by 60%!

"Implementation of the Inovaxe equipment brought efficiencies that streamlined our kitting processes, resulting in a quick ROI. It also freed up valuable manufacturing space to support the significant growth of our company." – Brad Koury, Vexos General Manager
